software for WindowsQ: How

to import multiple JSON files

to Postgres using DataGrip? I

have a large number of JSON

files to import into a Postgres database. I tried copying each file to a location and using Import utility to import the file contents. This was very slow because the files are large (10-30 mb) and I have 16 GB of memory available on my machine. Is there any way I can import the files using a batch file or something similar? I tried running the script below by using the same location as

the source-file and using the same delimiter as the source-file but it didnt work. COPY "E:\shopping-directory\input_files" FROM 'source-file' with (fieldname = 'id', separator = ',', quote = '"', escape = '\\'); If it helps, the file is formatted as below: { "id": 10012, "lastName": "Anonymous", "firstName": "P", "lastUpdate": "2018-04-22T01:03:47.712Z",

```
"schoolName": "Stevan",  
"birthday":  
"2015-08-29T16:37:57.000Z",  
"email": "ahm@gmail.com",  
"couponId": "Coupon-123",  
"avatar": "", "gender": "M",  
"followers": 10, "followerId":  
10012 } A: I found a solution to  
my problem. In the postgresql  
database folder go to  
postgresql.conf and edit the  
location of the input-file, which  
is specified in the input-format
```

field. I used
\$PGDATA/input_files and this
worked as expected. Do a quick
search on \$PGDATA to learn
more about this variable. Q:
What are the most vulnerable
factors in
